INDEX OF VOLUME 12

Starred items are "Mathematical Pearls"

Adler, R. L. *Ergodic and mixing properties of infinite memory channels*, 924.

Albrecht, Felix. *On projective modules over semi-hereditary rings*, 638.

Aljančić, S. *Approximation of continuous functions by typical means of their Fourier series*, 681.

Andô, Tsuyoshi. *On gradient mappings in Banach spaces*, 297.

Andrews, J. J. *A chainable continuum no two of whose nondegenerate subcontinua are homeomorphic*, 333.

———*Embedding homotopy cells*, 917.

Armentrout, Steve. *A Moore space on which every real-valued continuous function is constant*, 106.

Avann, S. P. *Metric ternary distributive semi-lattices*, 407.

Azpeitia, A. G. *On the maximum modulus and the maximum term of an entire Dirichlet series*, 717.

——— *A remark on the Ritt order of entire functions defined by Dirichlet series*, 722.

Barrett, J. H. *Systems-disconjugacy of a fourth-order differential equation*, 205.

Barrett, L. K. *A note on regular curves*, 603.

Bartle, R. G. and Joichi, J. T. *The preservation of convergence of measurable functions under composition*, 122.

Baum, J. D. *An equicontinuity condition in topological dynamics*, 30.

Baumslag, Gilbert. *Some remarks on nilpotent groups with roots*, 262.

Bellman, Richard and Lehman, R. S. *The reciprocity formula for multidimensional theta functions*, 954.

Billingsley, Patrick. *The Lindeberg-Lévy theorem for martingales*, 788.

Bing, R. H. *A set is a 3 cell if its cartesian product with an arc is a 4 cell*, 13.

Blau, J. H. *Transformation of probabilities*, 511.

Blum, J. R. *On relatively nonatomic measures*, 457.

Blum, J. R., Norris, M. J. and Wing, G. M. *Asymptotic behavior of solutions of a functional equation*, 463.

Boen, J. R. *On p-groups of class three generated by three elements*, 978.

de Boer, J. H. *Localization in a graded ring*, 764.

Brace, J. W. *Approximating compact and weakly compact operators*, 392.

Brauer, Alfred and Shockley, J. E. *On Diophantine equations of the form* $x^n+y^n=hp^m$, 951.

Brickman, Louis. *On the field of values of a matrix*, 61.

Bridgland, T. F., Jr. *Asymptotic behavior of the solutions of nonhomogeneous differential equations*, 546.

Brown, Morton. *The monotone union of open n-cells is an open n-cell*, 812.

Bullen, Peter and Marcus, Marvin. *Symmetric means and matrix inequalities*, 285.

Burkill, H. and Petersen, G. M. *A relation between Riesz and Riemann summability*, 453.

Burkholder, D. L. and Chow, Y. S. *Iterates of conditional expectation operators*, 490.

Burton, L. P. See Garner, J. B.

Carlitz, L. *A generalization of Maillet's determinant and a bound for the first factor of the class number*, 256.

——— *Note on Lebesgue's constants*, 932.

*——— *A recurrence formula for* $\zeta(2n)$, 991

Cater, S. *Observations on a paper by Rosenblum*, 560
Chow, Y. S. See Burkholder, D. L.
Chowla, S. and Mordell, L. J. *Note on the nonvanishing of $L(1)$*, 283.
Cohen, Eckford. *Arithmetical notes*, I. *On a theorem of van der Corput*, 214.
*——— *A property of Dedekind's ψ-function*, 996.
Cohen, P. J. *A note on constructive methods in Banach algebras*, 159.
Cohn, Harvey. *Proof that Weber's normal units are not perfect powers*, 964.
Coles, W. J. *A note on matrix Riccati systems*, 557.
Comfort, W. W. and Gordon, Hugh. *Inner product spaces and the tri-spherical intersection property*, 327.
Corson, H. H. *A property of the real line equivalent to the continuum hypothesis*, 836.
Cronin, Jane. *Families of solutions of a perturbation problem*, 84.
Curtis, M. L. *Cartesian products with intervals*, 819.
Cuttle, Y. *On quasi-reflexive Banach spaces*, 936.
Dickinson, David. *On quasi-orthogonal polynomials*, 185.
Doss, Raouf. *On bounded functions with almost periodic differences*, 488.
Duffin, R. J. and Nehari, Z. *Note on polyharmonic functions*, 110.
Edelstein, Michael. *An extension of Banach's contraction principle*, 7.
Eggan, L. C. and Niven, Ivan. *A remark on one-sided approximation*, 538.
Eisenberg, E. *Duality in homogeneous programming*, 783
*Epstein, D. B. A. *Free products with amalgamation and 3-manifolds*, 669.
Evans, J. P. and Walsh, J. L. *Approximation by bounded analytic functions to functions represented by Dirichlet series*, 875.
Faith, Carl. *Radical extensions of rings*, 274.
Federer, Herbert. *Approximation of integral currents by cycles*, 882.
Feller, E. H. and Swokowski, E. W. *Reflective rings with the ascending chain condition*, 651.
Fort, M. K., Jr. *Sequences of homeomorphisms on the n-sphere*, 361.
Fox, W. C. Erratum to "*A new inequality for the Green's function*," 340.
Friedman, Avner. *On fundamental solutions of elliptic equations*, 533.
Fulton, C. M. *Conjugate radii of quadric hypersurfaces*, 357.
Garner, J. B. *Errata in theorems by Tomlinson Fort*, 553.
Garner, J. B. and Burton, L. P. *Solutions of linear differential systems satisfying boundary conditions in the large*, 100.
Gelbaum, B. R. *Free topological groups*, 737
——— *Note on the tensor product of Banach algebras*, 750.
Gilbert, J. D. *A note on a theorem of Fuchs*, 433.
Ginsburg, Seymour and Spanier, E. H. *Distinguishability of a semi-group by a machine*, 661.
*Goffman, Casper. *Complete sequences of functions*, 998.
*Goffman, Casper and Neugebauer, C. J. *Linearly continuous functions*, 997.
Goffman, Casper and Waterman, Daniel. *Approximately continuous transformations*, 116.
Gordon, Hugh. See Comfort, W. W.
Goto, Morikuni. *Note on a topology of a dual space*, 41.
Grünbaum, Branko and Motzkin, T. S. *On components in some families of sets*, 607.
Gutwirth, A. *An inequality for certain pencils of plane curves*, 631.
Heath, R. W. *A regular semi-metric space for which there is no semi-metric under which all spheres are open*, 810.

Heller, Alex. *Indecomposable representations and the loop-space operation*, 640.
Hermann, Robert. *A Poisson kernel for certain homogeneous spaces*, 892.
Hertzig, David. *Forms of algebraic groups*, 657.
Herz, C. S. *A maximal theorem*, 229.
Hill, Paul. *Limits of sequences of finitely generated abelian groups*, 946.
Hirsch, M. W. *Immersions of almost parallelizable manifolds*, 845
Hobby, Charles and Wright, C. R. B. Erratum to "*A generalization of a theorem of N. Itô on p-groups*," 1000.
Homer, R. H. *Regular extensions and the solvability of operator equations*, 415.
Howarth, J. C. *Automorphisms of a finite Abelian group which reduce to the identity on a subgroup or factor group*, 422.
Hughs, R. E. *Functions of* BVC *type*, 698.
Hunter, R. P. *On a conjecture of Koch*, 138.
Indritz, Jack. *An inequality for Hermite polynomials*, 981.
Iseki, Shô. *A proof of a functional equation related to the theory of partitions*, 502.
Itô, Jun-Iti. *The coefficient problem of regular functions*, 53.
Jackson, S. B. *A note on arcs of finite cyclic order*, 364.
Jans, J. P. *Duality in Noetherian rings*, 829.
Johnson, H. H. *On the pseudo-group structure of analytic functions on an algebra*, 218.
——— *On infinite prolongations of differential systems*, 588.
Joichi, J. T. See Bartle, R. G.
Kadison, R. V. *The trace in finite operator algebras*, 973.
Kalish, G. K. *On isometric equivalence of certain Volterra operators*, 93.
Kan, D. M. and Whitehead, G. W. *On the realisability of singular cohomology groups*, 24.
Kane, Julius. *A uniqueness theorem for the reduced wave equation*, 967.
Karrer, Guido. *On the existence of cross sections in locally flat bundles*, 621.
Kelley, J. E. *Semi-peanian characterizations of E^2 and S^2*, 907.
Kinney, J. R. *Boundary behavior of Blaschke products in the unit circle*, 484.
Klee, Victor. *A question of Kalětov concerning the Hilbert parallelotope*, 900.
Kleppner, Adam. *On the intertwining number theorem*, 731.
Klingenberg, Wilhelm. *On compact Kaehlerian manifolds with positive holomorphic curvature*, 350.
Knebelman, M. S. and Yano, K. *On homothetic mappings of Riemann spaces*, 300.
Kobayashi, Shoshichi. *On automorphism groups of homogeneous complex manifolds*, 359.
Kohls, C. W. *A note on countably generated ideals in rings of continuous functions*, 744.
Kulik, Stephen. *A method of approximating the zeros of functions by quadratic formulas*, 476.
Kwun, K. W. *A fundamental theorem on decompositions of the sphere into points and tame arcs*, 47.
Laha, R. G. *On functions having non-negative derivatives at the origin*, 175.
——— *On a class of unimodal distributions*, 181.
Lamperti, John, *A contribution to renewal theory*, 724.
Leach, E. B. *A note on inverse function theorems*, 694.
Lees, Milton. *The solution of positive-symmetric hyperbolic systems by difference methods*, 195.
Lehman, R. S. See Bellman, Richard.
Lévy, Azriel. *Axiomatization of induced theories*, 251.

Li, Ta. *A note on integral transforms*, 556.
Lillo, J. C. *Approximate similarity and almost periodic matrices*, 400.
Liu, H. C. and Macintyre, A. J. *Cartwright's theorem on functions bounded at the integers*, 460.
Lorentz, G. G. *Relations between function spaces*, 127.
McArthur, C. W. *A note on subseries convergence*, 540.
McLachlan, E. K. *Extermal elements of a convex cone of subadditive functions*, 77.
Macintyre, A. J. See Liu, H. C.
Marcus, Marvin. See Bullen, Peter
Marcus, Solomon. *On commutativity of the second-order cross partial derivatives*, 562.
Margulies, G. *Peterson's theorem on surfaces corresponding by parallelism. I*, 577.
Martin, J. M. *Homogeneous countable connected Hausdorff spaces*, 308.
Massey, W. S. *Normal vector fields on manifolds*, 33.
Matsushima, Yatarō. *On the kernel of a topological semigroup with cut points*, 20.
Meisters, G. H. *On the equation $ax-xb=c$ in division rings*, 428.
Merkes, E. P. and Scott, W. T. *Starlike hypergeometric functions*, 885.
Michael, Ernest. *On a theorem of Rudin and Klee*, 921.
Miranker, W. L. *A well posed problem for the backward heat equation*, 243.
Mordell, L. J. *Irrational power series*, 522.
——— See Chowla, S.
Moroney, R. M. *The Haar problem in L_1*, 793
Mostert, P. S. *Reasonable topologies for homeomorphism groups*, 598.
Motzkin, T. S. See Grünbaum, Branko.
Myhill, John. *Note on degrees of partial functions*, 519.
Nachbin, Leopoldo. *On the finite dimensionality of every irreducible unitary representation of a compact group*, 11.
Namioka, I. *A substitute for Lebesgue's bounded convergence theorem*, 713.
Nehari, Z. See Duffin, R. J.
*Nelson, Edward. *The distinguished boundary of the unit operator ball*, 994.
*——— *A proof of Liouville's theorem*, 995.
Neugebauer, C. J. See Goffman, Casper.
Neuwirth, L. *The algebraic determination of the topological type of the complement of a knot*, 904.
Newman, D. J. *The nonexistence of projections from L^1 to H^1*, 98.
Nishiura, Togo. *The Geöcze k-area and a cylindrical property*, 795.
——— *Semi-compact spaces and dimension*, 922.
*Niven, Ivan. *Minkowski's theorem on nonhomogeneous approximation*, 992.
——— See Eggan, L. C.
Nomizu, Katsumi. *Holonomy, Ricci tensor and Killing vector fields*, 594.
Nomizu, Katsumi and Ozeki, Hideki. *The existence of complete Riemannian metrics*, 889.
Norris, M. J. See Blum, J. R.
Oehmke, R. H. *On flexible power-associative algebras of degree two*, 151.
O'Keefe, K. B. *A symmetry theorem for the differential ideal [uv]*, 654.
Ore, Oystein. Addendum to "*Sex in graphs*," 510.
Orey, Steven. *Sums arising in the theory of Markov chains*, 847.
Ostrowski, A. M. *On some conditions for nonvanishing of determinants*, 268.
Ozeki, Hideki. See Nomizu, Katsumi.
Pakshirajan, R. P. *A property of regular measures in locally compact Hausdorff spaces*, 628.

Palais, R. S. *Logarithmically exact differential forms*, 50.
Palais, R. S. and Stewart, T. E. *Torus bundles over a torus*, 26.
Paley, Hiram. *On Galois subrings of a full ring of linear transformations*, 941.
Patty, C. W. *Homotopy groups of certain deleted product spaces*, 369.
Petersen, G. M. See Burkill, H.
Petty, C. M. *Surface area of a convex body under affine transformations*, 824.
Phelps, R. R. *Extreme points of polar convex sets*, 291.
——— *A Banach space characterization of purely atomic measure spaces*, 447.
Posner, E. C. *Summability-preserving functions*, 73.
Raymond, Frank. *The orbit spaces of totally disconnected groups of transformations on manifolds*, 1.
Reichbach, M. *Remarks on a theorem of M. Altman*, 330.
——— *Fixed points and openness*, 734.
Reiner, Irving. *Subgroups of the unimodular group*, 173.
Restrepo, R. A. *Some differential equations on closed manifolds*, 315.
Rinehart, R. F. *Differentiable intrinsic functions of complex matrices*, 565.
Robertson, A. P. and Robertson, Wendy. *On the space of subsets of a uniform space*, 321.
Robertson, Wendy. See Robertson, A. P.
Roos, B. W. *Note on a theorem of E. A. Robinson on sums of stationary random variables*, 880.
Roos, B. W. and Sangren, W. C. *Spectra for a pair of singular first order differential equations*, 468.
Rosenlicht, Maxwell. *Toroidal algebraic groups*, 984.
Ross, K. A. *Extending characters on semigroups*, 988.
Rotkiewicz, A. *On the numbers* $\phi(a^n \pm b^n)$, 419.
Saalfrank, C. W. *A generalization of the concept of absolute retract*, 374.
Sachs, David. *Identities in finite partition lattices*, 944.
Sangren, W. C. See Roos, B. W.
Schmidt, W. M. *Continuous functions defined on product-spaces*, 918.
Schreiber, M. *On the spectrum of a contraction*, 709.
Schuske, Georgellen and Thron, W. J. *Infinite radicals in the complex plane*, 527.
Schwartz, A. J. *On certain conditions for the existence of invariant linear functionals*, 857.
